DONIT JIJU

Bengaluru, Karnataka | +91 63609 75935 | donitjiju745@gmail.com | linkedin.com/in/donitjiju | github.com/donitjiju745

SUMMARY

B.E. student in AI & Machine Learning with hands-on experience building NLP systems, deep learning pipelines, and full-stack AI applications I am currently learning how language models work and slowly figuring out where I fit in the AI world.

EDUCATION

B.E. — Artificial Intelligence & Machine Learning

Global Academy of Technology, Bengaluru, Karnataka

*C*GPA: 9.21

TECHNICAL SKILLS

Languages: Python, Java, C, SQL, JavaScript

Frameworks: FastAPI, LangChain, React, Streamlit,

ML / DL: Whisper, LSTM, FAISS, NLTK, HOG, ResNet-34 Face Embeddings

Tools: Git, GitHub, Jupyter, Postman, HuggingFace, SQLite

ACADEMIC PROJECTS

Pragmatic Reasoning for Low Resource Language in Legal Domain — Major Project | *Feb 2026 – Present*

- Researching the "English-as-Pivot Gap" in legal NLP; building a multilingual pipeline with LangChain + FAISS, and FastAPI .
- Designed RAG-based retrieval over Kannada legal documents with speech input support via Whisper ASR.
- Built a specialized reasoning layer that maps informal grievances into formal legal charges.

Seizure Detection System — EEG Signal Classification | *May 2026*

- Built an end-to-end ML pipeline on CHB-MIT EEG dataset trained an XGBoost classifier with cross-validated metrics.
- Deployed an interactive Streamlit dashboard for real-time EEG visualization, prediction, and automated report generation.

Smart Classroom Assistance System — Computer Vision & ML | *Sep – Dec 2025*

- Engineered a real-time computer vision workflow using dlib's 68-facial landmark model and solvePnP to compute Head Pose Estimation (Yaw/Pitch) and Eye Aspect Ratio (EAR), accurately classifying student states as Attentive, Distracted, or Inattentive.
- Built an asynchronous Flask and OpenCV dashboard that automates biometric multi-angle registration, implements duplicate-free hourly attendance logging into structured Excel sheets

VoyageIQ — NLP Travel Chatbot | *April 2026*

- Developed a travel assistant with FastAPI + React featuring intent detection, NER, and sentiment analysis.
- Combined a conversational chat panel with a live dashboard that aggregates transport options, hotels, tourist spots, and booking hacks in one place.

ACHIEVEMENTS & ACTIVITIES

- Participated in College Level Hackfest 2025 on Cybersecurity.
- Participated in ACM Student Chapter Prompt Battle 2026.
- Co-authored a comprehensive research survey paper detailing regional cross-lingual legal NLP pipelines and successfully submitted it to the prestigious Inc4 conference in April 2026.
